

Join Lakes Area Unlimited Learning at the Forestview Middle School Planetarium on Monday, December 8th from 3:30 - 4:45.

We will enjoy a beautiful view as our presenter, Tim Peabody, shares information about the northern and southern December skies. Tim will talk about central Minnesota Ojibwe culture and their connection to the night sky. We will also be entertained with a full dome feature. The show will last about an hour.

Attendees should plan to arrive at Forestview Middle School around 3:15PM, to avoid school traffic, and can park in the front lot. Enter through the front doors. Signs inside the front entrance will direct people to the Planetarium on the second floor. An elevator is available, if needed.

The program starts at 3:30PM at Forestview Middle School, 12149 Knollwood Dr., Baxter MN. It's free for members and \$10.00 for non-members.
